

PASTE STAINLESS STEEL CLEANER

This **PASTE STAINLESS STEEL CLEANER** is a silica-based product, containing organic solvents and tension agents.

It is formulated to be used as it stands - it must not be diluted.

It is very effective for cleaning all oxidised or soiled metal surfaces such as stainless steel, bronze, brass, copper, anodised aluminium, etc.

It leaves a protective effect on the stainless steel over time.

PHYSICAL CHARACTERISTICS

Appearance : Creamy
Colour : Whitish
Odour : Characteristic
Density : 1.31
Flash point : /
Solubility : Insoluble in water.

APPLICATION

Apply the product to the part to be cleaned, and rub with a sponge. The polishing action begins as soon as the product becomes dry.

You can wipe the surface easily with a clean cloth, and the metal quickly regains its shine.
